Award of contracts for supplies and services

The subsidy shall be used cost-effectively and economically. When bids of equal merits are received, preference shall be given to bids from the project country or neighbouring region, or other partner countries of development cooperation, over procurements in industrialised countries.

1. If procurement in Germany is nevertheless unavoidable, the following points must be observed:

- Include transport costs.
- Duty-free import is expected and this possibility must be verified.
- Examine import restrictions.
- Select the least expensive method of payment.
- Take advantage of VAT refund.
- The obligations of the project executing agency arising from § 98 of the German Act against Restraints of Competition (GWB) and the Regulation on the Award of Public Contracts (VGV) to apply the VOB/A or VOL/A or other procurement regulations, are effective.
